## Perseus (USAC 12000)

USAC 12000 is a new Open Field Beit Alpha cucumber with high-quality, dark-green fruit, and can be produced in warmer climates. This variety is characterized by a prolific plant that produces fruit averaging in length 6 by 1 inches (16 by 3 centimeters). Disease resistance: CMV, WMV, PRSV, ZYMV, PM, DM.

## USACX 0111

This new Parthenocarpic Beit Alpha cucumber is early maturing with a vigorous plant habit and high yield potential. USACX 0111 produces high-quality uniform, dark-green fruit that is 6 to 7 inches (15 to 17 cm) in length. For optimum performance, plant in either spring or early autumn. Observed disease resistance: PM, CMV, DM.

## USACX 0330

USACX 0330 is an early high-yielding parthenocarpic cucumber. It has a strong plant, with high-quality attractive dark glossy green, uniform fruits averaging 6 inches (15 centimeters) in length. USACX 0330 performs best when planted in spring to summer season. Disease resistance: PM.

## USACX 884

USACX 884 is an early maturing Parthenocarpic Beit Alpha cucumber variety. The fruit are multi-pistillate (3 to 4 fruits per node), uniform, dark green in color with medium ribbing and approximately 5.9 inches in length. USACX 884 has a concentrated set and can be produced in spring/summer. Disease resistance: PM, Scab.

## New Moon (USAMX 90008)

USAMX 90008 is an attractive new main-season honeydew with outstanding eating quality. USAMX 90008 produces a heavy set of uniform fruits, which average 5 and 6 counts. Fruits are round to slightly oval in shape with a firm creamy white exterior, small internal cavity, and attractive green flesh. Disease resistance: F-0, F-2, PM-1.

## Full Moon (USAMX 63001)

USAMX 63001 is a new honeydew introduction with an attractive green flesh color, small cavity, and superior eating quality. This main-season variety produces excellent high-quality fruit on a strong plant. USAMX 63001's exterior is smooth and creamy white in color. Observed disease resistance: F-2, PM-2.

## Elete (USAM 90000)

Elete (USAM 90000) is an early-main season Western Shipper melon with a vigorous vine producing uniform, round fruit that consist of 9 and 12 counts. The fruit is heavily netted with an appealing orange color flesh, and small cavity. Disease resistance: F-0, F-2, PM-1, PM-2.

## Dione (USAMX 90011)

Dione (USAMX 90011) is a high-quality Italian melon featuring Charentais netting with dark-green striping. The fruit is oval in shape with a tight cavity, producing 12 and 15 counts. The intense orange interior flesh color is firm, aromatic, and very sweet with an average Brix rating of 13. Disease resistance: F-0, F-2.

## USAM 63000

USAM 63000 is a new Yellow Canary melon with early-main season maturity. The high-quality fruit are oval in shape, with a brilliant canary yellow exterior color. The interior flesh color is light green to creamy white, thick, firm, and very sweet. The fruit average 3.5 to 4.5 pounds. Observed disease resistance: F-2, PM-1, PM-2.
